2 Year Certificate 2 Year Degree 4 Year Degree

Registry Number _____

Program attended _____

Dates attended _____ through _____

6. Have you ever been convicted of a crime (misdemeanor or felony)? Yes No

If yes, give details on a separate sheet.

You should be aware that any conduct or activities that have violated the American Registry of Radiologic Technologist (ARRT) “Rules of Ethics” may impair your application to the program and your eligibility to take the certification examination given by the ARRT. Violations of the “Rules of Ethics” that must be reported include: conviction of a crime such as a felony, a gross misdemeanor, or a misdemeanor with the sole exception of speeding or parking violations. All alcohol and/or drug related offences must be reported. This means even if you successfully complete all program requirements and get a degree when you apply to take the ARRT certification exam you may be denied. This will prevent you from working as a Radiation Therapist. If you have been convicted of a crime? Contact the program. You will be instructed to submit a pre-application for examination to the ARRT to determine your eligible to take the examination upon completion of the program. To review the pre-application and to learn more about the ARRT go to www.arrt.org, look under Ethics (left side bar) then choose pre-application.

To the best of my knowledge, all information that is provided on this form is true and accurate.
